

Meter Replacement Project Update

The first appointments for water meter replacement began this morning. In the coming weeks, residents can expect to see vehicles with East National Water (ENW) logos (pictured below), as they make their way through the distribution system. All personnel involved in the project will have identification tags, and are also on file with the Village Office and Police Department.

ENW will be sending out mailers requesting that property owners set up appointments for the work. Residents may call, toll free, 1 (800) 252-8556, or go to the ENW website: <http://eastnationalwater.com/> to arrange a convenient time for the work to be performed. At no point during the meter replacements should any personnel request payment for services, as all expenses are covered in the contract between ENW and the Village Water Department.
